### Client-Side Technologies

JavaScript, HTML, CSS, JQuery, ReactJS, Angular, Typescript, NextJS

### Databases

Microsoft SQL Server, MongoDB, MySQL, PgAdmin4

### Project Management

Tool Slack, Trello, Basecamp, JIRA

### Source Control

Github, Butbucket

## RECENT PROJECTS

### Synergy Solutions (AML Risk Assessment & Screening)

Start Date: Jan 2024 Finish Date: Apr 2024

Location: Grand Cayman - Cayman Islands

Synergy Screen is a web app where users can conduct Sanctions Screening (Anti-Money Laundering (AML) and Counter-Terrorist Financing (CTF) control used to detect, prevent, and disrupt financial crime). The above screening is performed by integrating Yente Server DB, which provides functions to search, retrieve, or match Follow The Money entities, including people, companies, or vessels that are subject to international sanctions. The data combines the sanctions lists, databases of politically exposed persons, and other information about persons in the public interest into a single, easy-to-use dataset. There is other facilities like user sign up, login and subscription plan module using Plug n Pay payment. Based on that user has actions on screening based on purchased plan.

### Commonwealth Bank

Start Date: Oct 2023 Finish Date: In Review

Location: Bahamas

The Laravel project "Commonwealth Bank" is a cutting-edge banking solution designed to improve user experience and operational effectiveness. The project incorporates cutting-edge features like simple content management, workflow automation, event scheduling, Netclues OnePush social post production, smooth file handling, dynamic form creation, and rate API connection by utilizing Laravel's sturdy framework. This all-encompassing strategy establishes a new benchmark for the financial services sector by guaranteeing a simplified banking experience for administrators and clients alike.
